

A WINNING RECIPE

Quick reference guide for making awareness rime with Play!

01 ROOTED IN THE NEEDS OF THE COMMUNITY

By clearly identifying the need to meet, we can create a meaningful educational activity.

02 ROOTED IN REALITY

By including other actors from the community who are specialized in the issue that we wish to address, we allow the doors of the school to be opened in the community. It is important to offer a real picture of the issue in order to put it in context, using data, but also real testimonies.

03 OFFERING A FUN ENVIRONMENT

The play-based pedagogy helps to generate curiosity and motivation for the content that will be explored. By allowing the use of educational materials that use the codes of board games, for example, the content is acquired in a fluid and less controlled way.

04 PROMOTING COLLABORATION AND ACTION

Through teamwork, students can challenge their opinions, work on their arguments, develop strategies. These elements are essential to developing their know-how.

05 OFFERING CONCRETE SOLUTIONS

This is the essential ingredient of this recipe! By having solutions that are within their reach, students will be able to engage in personal, relational and systemic change! Discussions on solutions are important to encourage youth engagement and to not leave them in a state of anxiety or powerlessness in the face of issues that may be complex!
