

Youth Organization Database - Dialogue with Peers

Building on the ffwd2020 ideation sessions, the Young Diplomats of Canada held consultations with policymaker, NGO and youth voices to determine opportunities to revamp the Youth Organization Database

I love the database and the breadth of organizations it includes, but I'm having trouble navigating the database, especially on my phone

It would be nice to easily search the database or be presented with a subset of organizations in areas I care more about!

I like the database, but dislike how I need to visit each organization's website to understand what opportunities it offers youths

I'm hoping that the tagging of the organizations can be more intersectional, so that it truly represents the mission of the organizations

There are some organizations that I've heard of that are not included in the database. Is there a way for them to be easily included?

I love how all the contact information is handy - it helps me with my youth-focused outreach campaigns

I've never used Airtable before and find that it's difficult to navigate. I wonder if there's some sort of primer that can be put together?

I found many of the entries to be incomplete or outdated. I actually had to export the database so my youth organization can update it ourselves!
